Flutter Developer and Informatics Engineering graduate with hands-on experience developing and maintaining cross-platform mobile applications. Experienced in Flutter, Dart, REST API integration, Firebase, GetX, BLoC, Provider, local storage, and application debugging. Familiar with production application development, code refactoring, QA collaboration using Jira, application monitoring, CI/CD, and Google Play Store deployment.

Education

Universitas Komputer Indonesia

Sep 2021 – Oct 2025

Undergraduate Informatics Engineering, 3,73/4.00

Professional Experiences

Mobile Developer Intern

PT Ragdalion Revolusi Industri | 6 month

- Developed and maintained cross-platform mobile applications using Flutter and GetX.
- Implemented new application features and integrated REST APIs into existing mobile applications.
- Refactored existing Flutter codebases to improve maintainability and support further feature development.
- Collaborated with the QA team using Jira to identify, track, and resolve application issues.
- Contributed to the development of **Sikomo**, an application published on Google Play Store.
- Contributed to **Cerol v5**, an application published on Google Play Store.
- Implemented feature improvements and REST API integrations for the **Andon Calling Ragdalion** application.
- Performed bug fixing and issue resolution for **Cerol ERP v5**.

Teknologi Laskar Mulia | 3 month

Flutter Developer

PT Teknologi Laskar Mulia | 3 months

- Developed the front-end of a school management application using Flutter, translating UI/UX designs into responsive, cross-platform screens.
- Mentored software engineering interns on Flutter fundamentals, project structure, and app development best practices, including troubleshooting.

Projects

Safe Keyboard

Kotlin | Supabase | Firebase | 2026

- Developed an Android custom keyboard app that detects and filters harmful content profanity, pornographic, gambling, and drug-related terms in real-time as the user types.

- Built and maintained backend infrastructure using Supabase, including RLS (Row-Level Security) policies and age-gated user registration.
- Published the app to **Google Play Store**.

Jasmaniku

Flutter | BLoC | Firebase | Laravel REST API | 2025

- Developed a mobile application for monitoring daily activities of elementary school students.
- Implemented BLoC for state management and Clean Architecture.
- Integrated Firebase services and Laravel-based REST APIs to support application functionality.

Social Media Application

Flutter | Firebase | 2024

- Developed a social media mobile application as part of a university project.
- Used Flutter for application development and Firebase as the backend service.

Learning Management System

Flutter | Firebase | 2022

- Developed a mobile Learning Management System for managing student assignments.
- Implemented the application using Flutter and Firebase.

Technical & Skills

- Languages & Frameworks: Dart, Flutter, Laravel, React and Kotlin (Basic)
- State Management: BLoC, GetX, Provider
- Backend & APIs: REST API, Firebase, Supabase, MySQL
- Firebase: Authentication, Cloud Messaging, Storage, Crashlytics, Analytics
- Local Storage: SQLite, Hive, SharedPreferences
- Architecture & Concepts: Object-Oriented Programming, Clean Architecture, MVC, MVVM
- Tools: Git, GitHub, GitLab, Postman, Jira, Sentry
- Android: Android SDK
- CI/CD & Deployment: Codemagic, Google Play Store publishing

Certifications

- Flutter Expert Decoding
- AI Multi-platform Intermediate IDCamp
- SOLID Principles Decoding
- Junior Web Programmer
- KEMNAKER Magang Hub Batch 3 2026
